Tighten the ratchet and tie it up

### Heat treatment

Heat treatment more strength  
Lashing more powerful.

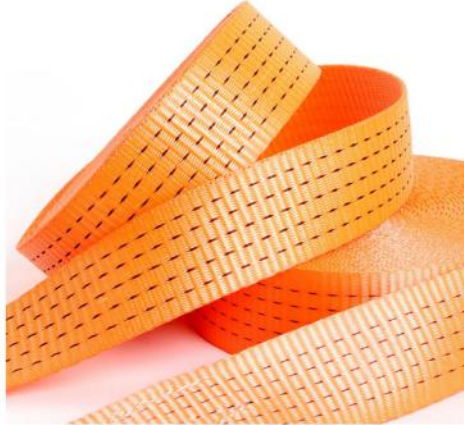

### Double-J hook

Not afraid of falling off  
Easy to tie  
Goods are firmly tied

## PRODUCT DETAILS

- 1** Widen and thickened binding strap  
It has no elasticity, water absorption, strong adaptability, and is not easy to break. It can effectively prevent corrosion caused by long-term sunshine and rain.

- 2** Double row hook  
The binding is not easy to fall off, and the easily accessible traceless radian is not worried about the scratches of the goods, the breakage and falling off of the hook.

- 3** Simple operation  
The operation of the new tensioner is simple. You don't need to use brute force to pull the goods. You only need to have a tensioner, saving time and effort!
